LINE PIPES

**ENRICHING
LIVES**

VISION + WELLBEING =

JINDAL TUBULAR USA, LLC

Jindal Tubular manufactures large diameter Helical (Spiral) Seam SAW pipes with a coating facility adjacent to the pipe mill. Jindal Tubular's customers include major oil and gas companies, midstream pipeline owners and operators, and the critical pipe distribution market in North America.

The facility occupies over 155 acres and is strategically located in Bay St. Louis, Mississippi, with logistical capability of shipments by barge, rail and truck.

The Company strives to create the best quality pipes in the market and works continuously to improve product quality, efficiency and customer satisfaction.

GOING THE DISTANCE

We believe in moving forward into the future hand-in-hand with our people. Their health and welfare are important to us.

In keeping with the worldwide safety vision and goal, we, as a company, are constantly striving to build a better and sustainable HSE (Health, Safety and Environment) culture at the workplace to ensure that our employees are safe and well.

KEY PILLARS TO GO THE DISTANCE
PREVENTION. PARTICIPATION.
LEARNING. WELLNESS.

HEALTH

SAFETY

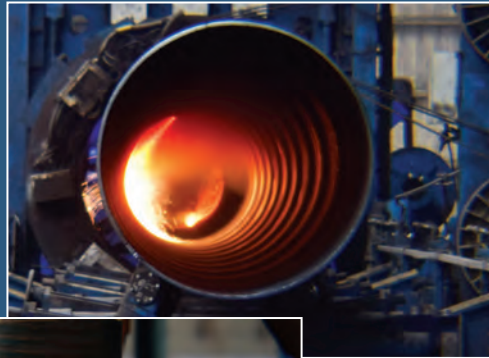

ENVIRONMENT

INTEGRITY &

COMMITMENT

Jindal Tubular manufactures spiral pipe utilizing advanced technology in a high-speed 2-step process. In the first step, pipe forming takes place as the steel is uncoiled, straightened, flattened, and then helically rolled to form the desired pipe diameter. In the second step, the previously formed and tack welded pipe is submerged arc welded (SAW) along the spiral joint. The SAW process is carried out on 4 welding lines, utilizing digital welding technology and optical seam tracking.

HSAW pipes:
Size Range: 24" to 60"
WT: 0.375" to 1.00"
Grade: API 5L up to X-80
Pipe Lengths: 25 ft - 81.5 ft
Annual Capacity: 300,000 tons

STAYING AHEAD

The Jindal Tubular USA facility has an external and internal coating plant adjacent to the pipe mill.

- Coating:**
- **External:**
 - Fusion Bonded Epoxy
 - Abrasion Resistant Overcoat
 - **Internal:**
 - Flow Efficiency Epoxy Liner

DYNAMIC THINKING

QUALITY + CONSISTENCY = TRUST

LOGISTIC CAPABILITIES OF JINDAL TUBULAR USA, LLC

Barge

From our barge docks adjacent to the plant, pipes are loaded by a special vacuum lift into barges. With direct access to the Intercoastal Waterways extending from Brownsville, TX to the Eastern Seaboard, and the vast Inland Waterways reaching into the interior of the continent, our barge delivery service is fast and reliable.

Rail

The Port Bienville Railroad connects us directly to the CSX Railroad. The CSX network covers the eastern United States and interconnects with all other major railroads to provide seamless delivery service to any destination in the USA and Canada.

Truck

When trucking is the best solution, it is a short distance from JTU to the east-west cross county highway Interstate 10, and to Interstate 59 to travel north. Our drive-on weigh scale at the gate assures accurate weights and records.

In-bound materials

Inbound materials are handled with the same care and efficiency by all three modes of transportation.

CREATIVITY

SKILLS

INFRASTRUCTURE

UNMATCHED CAPABILITIES

Jindal Tubular USA LLC is a joint venture between P.R Jindal Group and Ferrotech FZE, with majority owned by P.R Jindal Group.

Mr. P.R Jindal established SAW Pipes Ltd., (now known as Jindal SAW Ltd.) in 1984 with its first state-of-the-art plant in Kosi Kalan in UP, India. Since then, the Company has grown multi-fold and has diversified its product line, offering "Total Pipe Solutions" across a wide array of sectors - Energy, Water & Sewage Transportation and Industrial Application.

In the year 1992, P.R Jindal group ventured into manufacturing in the United States and currently owns facilities in Texas, Mississippi and Minneapolis.

Ferrotech FZE is owned by Mr. Braja Mishra who is an expert in the Pipe industry covering OCTG and Line Pipe for Oil & Gas.

Jindal SAW USA, LLC.
Baytown, TX
External Coating: (2"-48" OD)
Types: 3 LPE & LPP; FBE; ARO; Powercrete
Internal Coating:
Types: Epoxy Coating (16"-48" OD) & FBE Coating (2"-12" OD)
Tool Joint: Forging and Finishing

Drill Pipe International, LLC.
Baytown, TX
Manufacturing Capability
 ranges from 2 3/8" to 6 5/8" in grades E75, X95, G105, G105 with CY, S135 in length R 1, R 2, & R 3. Heavy Weight Drill Pipes up to 5-1/2", hard-banding and internal plastic coating.

Jindal Pipe USA, Inc.
Baytown, TX
Upcoming ERW Facility
 producing pipe from 8" - 26" OD, with a capacity of 300,000 TPA.

World Transload & Logistics, LLC.
Minneapolis, MN
Operates Tube Technology Inc., which produces non-API drill pipes & accessories.
Helical Anchors Inc. produces anchors and piles for the construction industry.
