

Dear Partners

We hope that all of you, your family members, colleagues and loved ones are safe and healthy amidst the COVID-19 pandemic, which has put the health system across the world under severe stress.

All of us at Jindal SAW Ltd and Hunting Energy Services are keeping well and have built in enough resilience in respective organisations to stay on course in strengthening our business fundamentals and operational readiness despite the prevailing economic headwinds.

During this period, we have also nurtured our Strategic Partnership where we are beginning to see green shoots emerging and pointing towards an optimistic future together. Our joint objective since beginning of 2019 was to provide a World Class Premium Connection OCTG product to serve our esteemed customers, culminating into licencing of JSAW Nashik facility for threading of Hunting Seal-Lock premium connections on 14th August 2019

In the last few months, we have jointly worked closely together to deliver promising future value-added services to the Indian Oil & Gas Industry which include:

- Reducing Import dependency, saving FOREX outflow.
- Building in-country/in-house capabilities by investing in training, equipment and technology transfer.
- Reduction in lead times with material delivered to doorsteps of E&P Operators.

Our current partnership is determined to develop Nashik as 'Centre of Excellence' by Product Augmentation and diversification to serve the ever increasing demands of the Oil & Gas Industry and we are both excited & committed to fulfilling the dreams of 'Aatmanirbhar' & 'Sashakt' Bharat and shall leave no stone unturned in achieving our goal.
